## For Children with Learning Differences

### A Direct Teaching Social Skills Program

Be part of an innovative direct teaching social skills program for children with learning differences. Some of the goals of the program include:

- Improved ability to create and maintain healthy peer relationships
- Develop effective problem solving techniques
- Create more positive interactions at school
- Improved interpersonal communication skills
- Improved ability to effectively communicate needs
- Reduced negative behaviour interactions
- Improved self-confidence

This program incorporates drama, art and role play to help children understand the core components of the program. The core components include: communication, problem solving and friendship building.

Programs are available for children 4-8 years of age. For more information on this program please contact:
